Mrs. Pyne pauses in reflection as she poses on her porch in Orem, Utah.

By FLOYD HOLDMAN Monday Magazine Associate Editor

Each semester an all-out assault gets under way on just about every tree, doorknob and old barn in Utah County. Scores of BYU photographers take camera, light meter and tripod in hand and battle the elements in that eternal quest for 'the perfect photograph."

They are students in Wallace Barrus' "Zone system" class, officially known as "Pictorial Photography." What is the zone system?

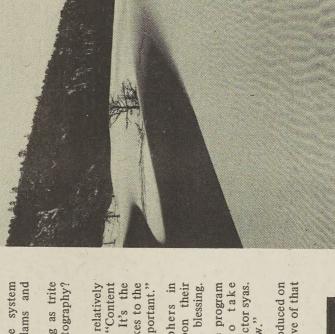

"The zone system is a method of absolute control in the photographic process," says Barrus, who heads the photography sequence in the Communications Department.

what the film can and cannot do, and then you precisely control this to produce the exact kind of photo you want."

A c c or ding to Barrus, "previsualization" is the real key to success in zone system photography.

"After you understand the system taught in the class," the veteran photography instructor adds, "you know exactly how every value in the original scene will be reproduced in the actual print."

Professor Barrus feels the work of photographers at BYU had gre at 11 y im proved since introduction of the zone system method here two years ago, with students approaching the kind of quality advocated by such

relieve her night patrol nausea. Writer Tamera Smith stops at 7-11 to Photo by Curtis Wong

Monday Magazine writer Tamera Smith doesn't see herself as the kind of woman to get hung-up on soap operas; she's too busy viewing the real world to watch much

Night on

the town

After putting in two shifts on night patrol with the Provo City police, Tami regrets that nothing really big happened... "just a few burglaries." She also regrets getting car sick at first night out—seems that note taking and city driving got to her. "The officer stopped at a 7-11 for a coffee break, and I and felt okay after eating and found some interesting people and featured them in her articles. She Tami's first assignment on the Universe staff was the math-science beat. She hated the subjects but

started a class newspaper in sixth grade and edited junior and senior high publications in her home town Idaho Falls. She's a persistent girl. "My family bet against me ever graduating from college," says Tami. "My parents gave me two years—they thought I'd either get married or drop out. But graduation means a lot to me. It's going to take more than a little nausea to keep Tami out of journalism. "I've always wanted to be a journalist," she says. She then moved up to the executive council beat. She soon had Reid Robinson whispering in her ear, and, of course, she dutifully reported what he told her. "Reid was furious," she reports, "but he said that he would conduct an open administration and that I could report anything he said."

And so, it wasn't out of the ordinary when Tami Smith and photographer Curtis Wong reported for briefing at the Provo Police Station. "I like to jump into the middle of things," said Tami.

Despair for me would be getting married after one year of college; I dred ever becoming a dormant, uninformed housewife."

Possibly the only way to keep Tami Smith uninformed would be to isolate her in a vault. 'I enjoy meeting people," she says. 'I'll take any assignment; I'm not afraid to talk with people and ask them questions."

Win one, lose one

Editor's note: This is another in a series of faculty essays on the theme of the Orsen F. Whitney Essay Contest, "How can BYU reach its prophetic destiny?"

from the quarry it meant years of aggravation as he tried to use one of the Lord's dumber creations to haul large blocks of stone. It is fine for us to remind ourselves of the destiny of the University, but we must understand the need for patient progress. We should soberly ask ourselves if we at BYU are committed to the trek or simply enthralled with the idea of a destiny.

Delight in appearances

By DR. CLAYNE POLK

Dr. Clayton Polk uses a little Latin and logic to conclude that BYU will not reach its prophetic destiny in a leap and a

unofficial scoring showed that BYU lead with 106 points, Utah was second with 43, CSU had 20, and CEU

d Benton Hart of BYU.

6 Results of the first three finishers in each event were as J follows: LONG JUMP: 23'4"

1. Bule BYU 2. VonGerich BYU 3. Howard Utah. POLE VAULT: 16'4" 1. Yates BYU 2. Blaylock unatt. 3. Barry

At the turn of the century the most famous textbooks of economics opened with the Latin phrase, "Natura non facit saltum." This can be loosely translated as "Nature does not move in jumps." This is a good slogan to keep before us as we commence the centennial year in which much will be said of this University's greatness and destiny. As a Church, a luniversity, and culture, we are continually attracted to the millenial dream. But, we find the small improvement which is needed or possible this year to be tedious and boring.

Greatness often seems simple and destined when viewed in retrospect. But, hindsight obscures the tough, uncertain, and difficult road that led to the pinnacle. To us the pioneers trek to the West is an herioc monument. To the pioneers it was a dusty, tiresome walk over thousands of hills and gulches. To us the Salt Lake temple is a physical symbol of our spiritual values. To the ox-team driver who hauled stone

Moral and intellectual standards
Other counter-productive attitudes could be suggested, but such discussion resolves itself into one question. Do we want BYU to be a great university or do we wish it to be something else? R. H. Tawney, the great British historian and social scientist, once said that a university should be an intellectual and moral standard to the world. The prophets have given us the Lord's moral standard. It is up to us to patiently create an intellectual standard that is a worthy companion to our moral standard.

BYU 3. U In the UTEP game, the Cougars could do I little right. Despite the height advantage BYU was also outrebounded 44-20. BYU hit only 19 of 48 field goal attempts and had only two players in double figures, Grig Clawson and Veryl Law. Clawson, a 6-3 senior, returned to the starting line-up for the first time in more than a month and responded with 12 points. Law, who was replaced in the starting five by Clawson, d came off the bench to get 11, seven of them coming on free throws.

UTEP center Gary Brewster led all scorers with 25 points and added 13 rebounds to his totals.

WAC

Hoop

After watching BYU's performance in El Paso it looked like BYU was sure to return home winless because they were also going into what New Mexico fans refer to as the "Pit."

In the "Pit" the Lobos hadn't been beaten in 25 consecutive games, having last lost in 1972 to Wyoming, 62-61.

BYU won the opening tip and 17 seconds later Jay Cheesman put in a lay-up and BYU led 2-0 and the Cougars were never caught.

One of the biggest direrences in BYU's play was the switch that Coach Glen Potter made in BYU's defensive alignment before Saturday's game. Instead of the zone that the Cougars had used unsuccessfully during the first four WAC contests, they played, instead, a tenacious man-to-man.

The overpowering defense gave New

they were accustomed.

Coach Potter explained the change strategy after the game. "We had given too many easy baskets to UTEP and zones just weren't working, so we said heck with them." The overpowering defense gave New Mexico several back door lay-ups at the outset but it also forced the Lobos to begin their patterns further from the baset than

The Lobos were bothered by the pressure and shot 47 per cent from the field in the game, but just 40 per cent during the second half.

When the first half ended the Cougars held a 43-33 lead. The defensive efforts of Cheesman and back-up center Troy Jones held the Lobos star pivotman, 6-7 Bill Hagins, scoreless in the first half. Forward Mark Handy led the first half attack with 11 points and five rebounds. Grig Clawson, in his second straight start, had six points at the intermission, including a 25 foot jump shot from the top of the key. In the second half BYU built its lead to 54-41 when New Mexico Coach Norm Ellenberger called time out.

After the break the Lobos made one of their many runs at the Cougar bulge.

The Lobos ran off eight straight points, cutting the lead to five, before Troy Jones broke the spell with a lay-up. Clawson and Chris Williams added baskets of their own to give the Cougars a 12 point advantage.

Hagins scored two baskets in the next minute to complement two other New

minute to complement two other New Mexico baskets and the Lobos had again cut the margin, this time to seven, 64-57.

BYU was equal to the challenge once more as Gifford Nielsen hit two jump shots in the next 58 seconds to put the Cougars in front by 11.

Two minutes later with the score 70-61, BYU ran off six straight points thanks to jump shots by Clawson and Law and two free throws by Troy Jones.

New Mexico called another time out and came back to cut the gap to 12, 76-64 before Cougar forward Greg Snow hit a jumpt shot. Frishman and Law followed with baskets of their own as BYU turned back the last Lobo rally.

With just under six minutes to play BYU led by 18, 82-64. The biggest margin of the game came with less than a minute to play when Vance Law put BYU ahead 96-74 on two free throws.

BYU had seven men in double figures for the game, with Clawson leading the way at 16. All of Clawson's points came on field goals as the 6-3 senior hit on eight of 16

Set the job that

"Something about the beauty really gets to you," says Mountaineer Ralph Brown as the sunset bathes the peaks with gold

looks better from the

By Janelle Brown

Although silent and forbiddingly cold, Mt. Timpanogos oes not pass through the harsh winter months undisturbed.

Enthusiastic and active in many facets of mountaineering, ompton regards winter climbers as "very individualistic cople" and the sport as "completely absorbing." While explaining techniques and experiences relating to winter

climbing, he emphasized the point that every prospective winter climber first needs proper instruction.

"Winter mountaineers face a number of hazards that call for special training," he said. "No one should attempt a winter expedition without the needed experience and

Compton as a mountaineering instructor's aid and as co-captain of the Utah County Search and Rescue Squad, described winter mountaineering as the only sport he knew requiring the enthusiast to be skilled in so many other winter activities. "Winter climbing can involve cross country skiing, downhill skiing, snowshoeing, glissading and rapelling," he Brown, a senior in communications who works with

Because where the became interested in climbing about six in years ago as a preparation for search and rescue work. He stilisted several advantages of climbing in the winter. "There's not as many people," he said, "and there's something about with beauty of white crispness that really gets to you."

Compton, who has made a winter climb of every major beak in Central Utah, offered more advantages. "There're no with mosquitoes, no dirt, it never gets too hot and there's always a potential supply of water available." he said. "I even enjoy potential supply of water available." he summer."

Because winter mountaineers must often cope with pe extreme weather conditions as well as the difficulties can be apply of the conditions as well as the difficulties can be a supply of the cope with the conditions.

proper clothing and dependable, specialized equipment was stressed by both Brown and Compton. A combination of ald down parkas and wool underclothing and pants is regarded as be the best clothing for climbers. Boots with lub soles must be large enough to fit over wool socks, and ponchos should be used to protect down coats from rain.

"You can lose 80 per cent of your body heat through your achead," Brown said, pointing out the importance of wearing a associated with treacherous snow and ice,

Other items mentioned by both BYU climbers as essentials were goggles, not sunglasses, to protect against snow blindness, and mittens. Mountaineers also need a frequent intake of both carbohydrates and protein.

Compton regards the ice axe as the most important specialized equipment in winter mountaineering. The axe, with a staff a few feet long has a pointed metal end at its base, as well as a blunt prong and sharp prong extending in opposite directions from its top. This axe aids the mountaineer both in climbing snow and ice and allowing him a means of self arrest in case he should slip.

John Shelton, BYU graduate and former president of the Alpine Club, makes a dramatic peak ascent.

Second in importance, according to Compton, is a rope, including the knowledge and experience to use it effectively. Crampons, plates of short metal spikes attached to the soles of boots, are also commonly used. Other equipment ice climbers use for safetly and aid include specialized ice

hammers and picks, ice screws, anchors and flukes.

What else is essential before beginning a winter expedition.?

Compton answered by telling about a midwinter ascent of last year on Timpanogos Mountain North of Provo.

"First we picked the route, noting its difficulty and length, possible avalanche problems and weather conditions. As for all climbs, we prepared in advance by getting into shape and getting enough sleep. We decided on an early afternoon turn around time—if we hadn't reached the summit by then, we'd start our descent immediately."

around time—If we hadn't reached the summit by then, we'd start our descent immediately."

Compton said his party chose the west ridge route, the common winter ascent choice. "The Aspen Grove route, which many hikers take in summer, is a death trap in winter," Compton said. "I've seen avalanches completely as engulf the mountain hut at Emerald Lake."

The party started to climb at 2 a.m. While cross-country skis are sometimes used to cover the approach, Compton said in this instance the area was a little too steep and narrow to make their use feasible.

"We roped up at about half the distance and one third the elevation," Compton said. He described the route as winding in and out of small cliffs, and said the party had to chop steps in the ice and snow in particularly steep sections.

"About 300 feet from the summit we entered a couloir, which we climbed. It was very cold and a strong wind was blowing," he said. Describing the summit, Compton called it "a harsh beauty." The party also made the descent on the mount in the summit we have the describer on the mount in the summit in "a harsh beauty." The party also made the descent on the

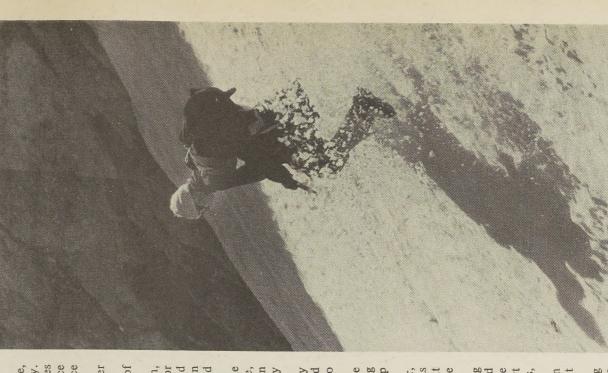

with the rich variety of climbs nearby and the increasing by popularity of mountaineering, cross-country skiing and winter sports in general, it only follows that more and more people are becoming interested in winter climbing. The sport can be practiced in various degrees by different individuals, bringing both personal satisfaction and growth.

Brown and Compton, however, issued a word of caution

about the importance of proper instruction and equipment

before undertaking a climb. "The importance of first learning the basics of climbing cannot be overestimated." Brown said. He emphasized the point by citing the popularity of two mountaineering activities, rappelling and glissading, and stating that only

cont. on page 13

Shelton demonstrates the art of glissading, sliding down the snow on one's feet.

"The Seventh Victim" is filled with unforgettable scenes. It is a frightening film, but not a "shocker," its scenes of horror build and create a poetically terrifying atmosphere by the time the film ends. A John Donne sonnet—"I run to Death and Death meets me fast, and all my pleasures are like Yesterday"—frames the film, fittingly summarizing the theme as one that portrays death as preferable to life. Mrs. Redi, one of the films bizzare, mysterious characters, approaches the protagonist in the shower and warns her to end her investigations. Only the shadow of Mrs. Redi can by made out, her huge hat and large face distorted and smeared by the shower courtain and the water splattering on it. Alfred Hitchcock, who admired Lewton's work greatly, could bery well have borrowed the "shower confrontation" scene when he amplified the idea somewhat in "Psycho."

The key images from "The Seventh Victim" occur in a run through the dark, dangerous New York City at night. That sequence, in which the viewer imagines, along with Jacqueline, all types of terrible things following her are waiting around the next corner, is an example of the difference between Lewton's and Universal's brand of horror. Universal wouldhave handled the scene by cutting back and forth between the moster—the wolfman, perhaps—and the pursued, intriguing and fascinating us with make-up and grotesque plastic surgery but eliminating suspense by showing us everything. Lewton lets us imagine for ourselves what's hiding in the shadows. While Universal gave us what's hiding in the shadows. While Universal gave us what's liminating suspense by hightmares, Lewton allows us to re-live our old fears of in the movie theatre, a far more profound and personal experience. He ends "The Seventh Victim" has been for years practically a lost film, hidden in college and TV station, and is beginning to receive it.

Mountaineering

cont. from page 3

"Rappelling is responsible for 70 per cent of climbing accidents, many times because inexperienced persons decided to try it," Brown said. Glissading, the art of sliding on snow on one's feet, using the ice axe as a rudder, is also dangerous unless a person is knowledgeable about its use, according to experienced and trained persons with the right equipment should attempt them.

Brown.

Compton added that anything that is steep enough to feet," Compt glissade on is too steep for an inexperienced person. slide a lot faster on your clothes if you fall than (feet," Compton said. "A person should be tho before glissadi on said. "A person should be the I than on your be thoroughly

trousers, the hazards is also cotton jeans Hypothermia, a major consideration in winter travels, can e accelerated by improper clothing, such as by wearing otton jeans that will "freeze up" instead of wearing woolen rousers, the climbers noted. A familiarity with avalanche climbers noted. A essential, they said.

Sale 32.95

Where can prospective climbers receive instruction? BYU offers a mountaineering class each semester dealing with aspects of rock climbing and snow and ice mountaineering. Both climbers also recommended the campus Alpine Club as "one of the best places to learn."

"The purpose of the Alpine Club is to teach students the fundamentals of climbing as well as provide them with

fundamentals of climbing as well as provide opportunities to practice their skills," Brown said.

ightening film

EDITOR'S NOTE: "The Seventh Victim" will play with "An American in Paris" as part of the BYU Film Society's program in 446 MARB on January 31, and in the Experimental Theatre (HFAC) on February 1.

By ROBERT GARRICK

After Universal Studios had made a fortune with cheap, but classic monster movies in the 1930s (Frankenstein, Cocash in on the popular genre. RKO Radio Pictures, a much larger studio than Universal at the time, hired Val Lewton, an immensely talented writer on and off the screen, to head a immensely talented writer on and off the screen, to head a immensely talented writer on and off the screen, to head a coefficient of the Cat People?).

"The Seventh Victim" has been called Lewton's "most personal and radical production; the film which, more than any other, reveals the man." At a recent screening, members of his family "felt him in the room" (Lewton died in 1951). As a producer, Lewton controlled the creative aspects of the film, surrounding himself with immensely talented young technicians. Mark Robson, who went on to direct box office smashes like "Peyton Place," "Valley of the Dolls," and this year's "Earthquake," made perhaps his most impressive film when he debuted by directing "The Seventh Victim" Micholas Musuraca was director of photography, as he was in the highly stylized "Spiral Staircase," discussed in this column last week. Charles O'Neal and DeWitt Bodeen wrote the script, probably with considerable guidance from Lewton.

Quakes 0 California

wooded area near the Provo River Sunday afternoon.

Police said they appeared to be stabbed to death. According to Chief Swen Neilsen, the city ambulance crew was called to the river bottoms at approximately 12:40 p.m. where it found the bodies lying in the brush near 1600 W.

earthquakes rumbled through this jittery desert town Sunday as city employes remained on emergency standby in the event of a major quake.

Over 30 tremors have been felt in the Imperial Valley community since Thursday and scientists believe a newly to formed earthquake fault south of town could be responsible. Seismologists at the California Institute of Technology in pasadena said the exact number of quakes in the latest series from the three-point range on the Richter scale.

Authorities said there were no reports of injuries or damage from the latest tremors. However several shocks since of Thursday, raning from a 3.5 to a 4.7 Richter measurement, cracked windows and brought merchandise to the floor in Brawley's business district.

Seismologists said the quakes have all been centered about three miles southeast of the agricultural community—just north of the Mexican border.

Scientists believe the new fault line, about seven miles in length and running in a northeast to southwest direction, may have been formed between Brawley and the small community of Westmoreland, 10 miles to the west. A male suspect was arrested at the scene and was being held in city jail for investigation of murder pending formal varges. Late Sunday nightt police were withholding the names of the victims until next of kin could be notified.

The infant was found nude and the female fully clothed. The girl appeared to be in her late teens and was from Provo. Chief Neilsen said the victims appeared to have been dead eabout 12 to 14 hours.

Detective Keith Miner and other detectives and officers from the Provo Police Department were continuing the

Oil summit scheduled

MONDAYS ONLY

By MICHAEL GOLDSMITH

Associated Press Writer

of ALGIERS, Algeria (AP)—The world's major oil exporting to nations in an effort to resolve their problems.

A communique issued in Algiers at the end of a three-day he ministerial conference of the Organization of Petroleum rs. Exporting Countries (OPEC) declared support for an international conference "which will deal with the problems to of raw materials and development."

Preparations will begin immediately for the first-ever ed summit meeting of OPEC heads of state to define the oil-producing countries' position in discussions with the oil importers, the communique said. The summit was scheduled to take place in Algiers between Feb. 21 and March 8.

Reports from Paris said a preliminary exporter-importer at agenda for a full-scale conference.

The connunique described the world economic crisis as "a treats directed at these conference and stability," but it he condemned "propaganda campaigns placing on OPEC or member countries the responsibility for the crisis, as well as threats create confusion and lead to confrontation."

The was evidently a reference to Secretary of State Henry A. KIssinger's recent statement—backed by President the producers.

HUGHES

HUGHES AIRCRAFT COMPANY

By STEVEN G. HUNT

The name of Pres. Nixon will conjure up memories of for Watergate, scandal and resignation for most people, but the name also means something else to approximately 200 por members of a BYU Branch.

After the nation's former president had put the White his was just beginning his service and leadership at BYU.

Pres. S. Reed Nixon was called to serve as a branch president of one of the campus branches of the L.D.S. at president of one of the campus branches of the L.D.S. at the president of one of the campus branched in a comedy of errors. Once he and his wife, Joyce, were caught in a check. 'I didn't have the needed identification,'' he said. But the clerk noticed my name was Nixon and asked if I was related to the President. I calmly told him that Richard Nixon was my brother, which is true. I have a brother named Richard. The clerk then cashed the check without further

question."

President Nixon also said, "At first, branch members were reluctant to call me President Nixon, but I assured them that it was okay."

French Fries and Sprite

Despite the fact that the number of students at BYU has not increased because a ceiling has been set to stabilize the enrollment at 25,000, the Branch was large enough to split, adding another branch to the BYU 4th Stake.

The new tri-semester program and a slight increase in the number of non-students attending BYU branches, were listed by Pres. Nixon as possible factors for the growth of branch members which necessitated the formation of an additional branch.

Concerning the new tri-semester program, the new president feels that it is accomplishing what it was intended to do, namely, to get a larger year-round total of students which would insure that the facilities of the university were used more throughout the entire year. Although there is a bit of controversy about non-students attending BYU branches, Pres. Nixon said he appreciated having some in the branch. "I like it," and "It's great," was his reaction to the 20 per cent in the 117th Branch that are non-students. He added, "It surely helps a lot in filling positions."

BYU's newest branch covers the southwest portion of Provo, or west of University Avenue and south of Center Street.

Pres. Nixon also said there are a few divorcees with children living within the branch boundaries which makes it

"one of the few single branches with a junior sunday school. He noted that, on the whole, the branch had older and more mature members with a number of returned lady missionaries and very few members under 20 years of age.

Despite this variety in the composition of the branch, Pres. Nixon said he thinks his calling as a branch president "is

In the basement of the station, in the jail, is a small room with a breath analyser, a room for questioning and an area with a black line painted on the floor. The person is given the breath test and is then asked to walk the line or pick up coins. If the person does not pass the test, he is either put in jail or released on "ROR"—released

work in the county. Someone must be contacted to verify this information and come in and take the drunk home Here is an exciting credit course for those who would like to learn to develop the greater potential of their memory. The first meeting will provide an overview of memory training. The second meeting will discuss how memory works, things that influence of memory, photographic memories, and other aspects of the nature of memory. General principles of memorizing will be discussed at the third and fourth meetings, including techniques of learning and how to study effectively. The fifth, sixth, and seventh meetings will cover specific mnemonic techniques and systems to improve the memory, and how they can be applied in everyday life to remember such things as lists, names, numbers, talks, and

Provo is the site of one of SUU tah's most unique of landmarks, a true-to-life, turret-topped stone castle and Reminiscent of the days of and Robin Hood and Maid SCA Marrian. But until recently st few Provoans knew what it looked like or even where it was. Last month, however, a wgroup of prominent citizens and BYU students teamed up in an attempt to raise more than a hundred thousand dollars to restore the forty-year-old structure to public use.

The Utah County Committee to Restore the Castle, as the group calls itself, is headed up by Brent Reynolds, Director of Patient and Public Services for the State Mental Hospital, where the Castle is located.

"Although we have considered restoring the Castle for more than 2 years, the idea first became a reality last summer when a theatrical group used the facility to present Shakespearian plays," says Reynolds. "It just seemed a natural location for dramatic and cultural productions."

behind the white-faced walls of the State Mental Hospital's administration building, like an Ancient Aztec temple hidden by tropical jungles. Its walls, made of stone quarried from Hobblecreek Canyon For almost 40 years the castle has remained secluded behind the white-faced walls

are in need of repair. Its fashingled roofs no longer lock out the rain and snow and the result of surrounding gardens are he over grown. But the he eight-hundred-seat amphitheatre is still in tact yf and the basic structure is as he sound as the foothills it a

SHAKEYS PIZZA PARLOR

Food costs W. Commission Pizza World's Greatest

With inflation running rampant and the cost of groceries spiraling upward every day, the average shopper is becoming more and more price conscious as she roams up and down the grocery aisles. Bargain hunting has become the order of the day.

What kind of quality are these bargain hunters getting for their money? Products which are less expensive are generally unknown name brands. Everyone is familiar with the cliche, "You're paying for the name." A popular name brand, almost without exception, will cost more money.

"We do a study every semester in which we sample different brands of foods that sell at different prices," says Mrs. Lavell Turner, an instructor in the Food Science and Nutrition department. "And we generally find that the lower priced brands are just as good as the higher priced ones."

More than 250 students and instructors participated in a recent FSN survey, said Mrs. Turner. "The survey was very informal and the main purpose was to serve as a learning experience for my classes," she explained. Mrs. Turner said various national name brand products. "The students judged on firmness, color, sweetness, uniformity and size," she explained. Judgment was subjective, However, the opinion of the majority was listed in the final analysis. "The students were nearly always in agreement," said Rebecca Jewkes, another instructor involved in the study. The results were surprising in that the less expensive products were usually found to be of the same or better quality than the more expensive products.

Beans Tested

Four different brands of beans were tested in the survey. The national name brand, Del Monte, was the most expensive, costing 32 cents per 1b. (A cost per pound was figured on each item because some items were packaged in varying quantities by each brand). Del Monte received an overall rating of "good". Touble Luck cost only 20 cents per 1b. and received the same "good" rating. A brand called Kuners cost 20 cents per 1b. and was rated larger in size and "good" tasting. "I liked Kuners better than any of them," said Mrs. Jewkes. Diamond A rated "average" and cost 30

In testing four different brands of peas, Del Monte was found to be "flat" and "poor" in quality and most expensive in price costing 33 cents per 1b. However, peas didn't vary much in price with Tastewell being the lowest at 29 cents per 1b. It was rated as "fair." "There are not as many brands that we can sample from nowdays," explained Mrs. Turner. "there used to be a lot more brands of an item when the economy was better," she added. Pierce brand peas received a "sweeter" and "soft" rating and cost 32 cents per 1b. Western Family rated "fair" and also cost 32 cents per 1b. Fruit cocktail was tested next in the survey. Hunts received only a "fair" rating and cost 43 cents per 1b. Stokely cost 45 cents per 1b. and was rated as being ugly and mushy. The best rating of fruit cocktail went to Western Family which received a "good" rating. A pound of Western Family fruit cocktail cost 43 cents.

Several brands of Tuna were also tested. The most expensive was a Safeway brand called Prince Paul. It cost \$1.48 per 1b. "They didn't like that at all," said Mrs. Turner. She explained that the reson was it was packed in water instead of vegetable oil. One grade of Del Monte tuna sold for \$1.30 per 1b. "The students liked that because it was packed in oil," said Mrs. Turner. Eatwell, Starkist's grated tuna, costs \$1.23 per 1b. It received a "fair" rating. Grated tuna is the lowest quality and should sell for less according to

Quality Differences

In testing four brands of pears, it was almost an even decision between Del Monte which costs 46 cents per 1b. and Townhouse which cost 41 cents per 1b. "Townhouse normally tastes better," explained Mrs. Turner, "but these were slightly off color." Rosedale received an "average" rating and cost 38 cents per 1b. However, it was determined that Rosedale contained more juice than any of the others. Highway cost 38 cents per 1b. and received an "average"

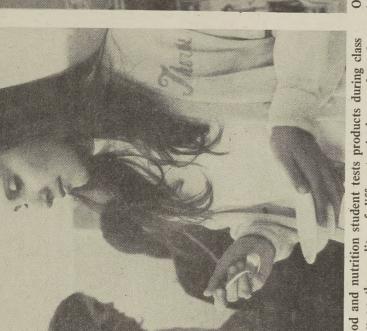

Tating.

If there is such a difference in quality among the different brands and prices the question arises: Are the higher priced tems more nutritious? "No," says Mrs. Turner. "The higher briced items usually just look better."

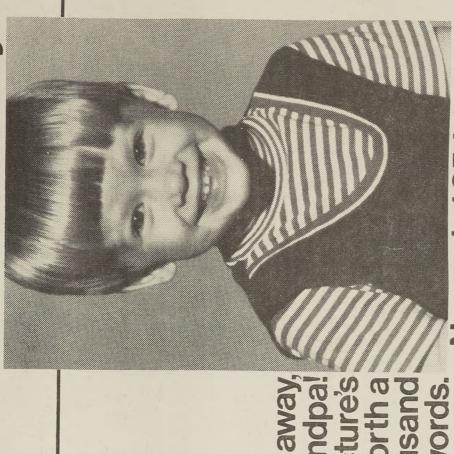

So the housewife on a budget can use discretion when hopping and save money without sacrificing quality.

A food and nutrition student tests products during class survey on the quality of different priced canned goods. Survey shows lower-priced brands are sometimes just as good as the higher-priced ones.

One class member pauses during taste test to evaluate her impression of a good tested during BYU food survey. Students in the survey agree higher-priced brands are not necessarily the best.

meal.
"I had heard of this happening in other aquaria," said the professor, "but I was so mad I laid into him with a wooden paddle. It is the only time I beat up on an

Sadly, there came a night when Armstrong lost his way home. Dr. Braithwaite found his limp body the next morning on the floor of the Zoology department, so now he is

But there are many other fascinating exhibits in the marine aquarium which Dr. Braithwaite runs on the first floor of the Widtsoe building. The nine tanks on display, each holding 250 gallons of circulated, filtered, 55 degree salt water, contain a filtered, 55 variety of sea barnacles without an octopus sea creatures, including lobsters, les, sea-anemones and

They come mainly from San Juan Island in Washington, where the professor conducts research and marine zoology classes each spring and summer, but some are from the California coast, and the horseshoe-crabs are

from Massachussetts.

"This is the largest marine aquarium in the State, and perhaps the only one on public display," claims the professor.

The display tanks set into one wall of a corridor for viewing, together with over 30 other marine tanks in the Zoology department, are primarily for student use in classwork, but the aquarium attracts a good deal of attention from outside of the

deal of attention from outside of the Zoology Department.

Students from grade schools as far afield as the Salt Lake Valley and from local junior and senior high schools throng the area in the spring and fall. The professor estimates that as many as 600 at a time have come to see what a live starfish or sea-anemone looks

BYU students, however, are as fascinated as the visitors and just as concerned for the welfare of the creatures on display. "It is amazing how much empathy people show toward animals," says Dr. Braithwaite. "The horseshoe-crabs have a habit of tipping over on their backs, so we had up to 50 students

horseshoe-crabs explaining that they will come to no harm on their backs, and that they can right themselves if they want to.
But still not everyone is convinced one coed spent over an hour urging a stranded crab to turn over. She eventually demanded, almost in tears, that someone should help it. But it was on its feet again by the time she returned with help, much to her relief.

each tank to

In addition to the marine feature, there are several tanks with freshwater fish under the care of Dr. Richard Heckman, Associate Professor of Zoology. Both the freshwater and marine displays are changed from time to time, so there is frequently something new to see at Utah's finest aquarium.
